PROFESSIONAL SUMMARY

Results-driven Python Full Stack Developer specializing in Django and Django REST Framework, with hands-on experience building scalable, production-ready web applications. Experienced in designing secure RESTful APIs, implementing authentication systems (JWT), and optimizing database performance using PostgreSQL. Skilled in building real-world systems using Docker, Redis, and Celery for asynchronous processing and high performance. Passionate about developing business-oriented solutions, writing clean and maintainable code, and continuously improving system scalability and performance. Currently seeking an opportunity to contribute to impactful backend systems and real-world products.

WORK EXPERIENCE

Full Stack Development Intern (Python & Django) – CCIC, Mansoura [Aug 2022 – Oct 2022 (3 months)]

- Developed backend modules for web applications using Django and Django REST Framework.
- Designed and implemented RESTful APIs for authentication and data management.
- Optimized database queries in PostgreSQL and MySQL to improve performance.
- Collaborated with team members using Git and followed clean code practices.
- Contributed to building scalable backend systems and improving application efficiency.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, REST APIs, JWT, Celery, Redis
Databases: PostgreSQL, MySQL
Frontend: HTML, CSS, JavaScript, Vue.js, Bootstrap
DevOps: Docker, AWS (Basic)
Tools: Git, GitHub

EDUCATION

Bachelor of Computer and Information Science – IT Department Mansoura University, Egypt [2019-2023]
Final Year Project: Developed a Gym Management System using Django and PostgreSQL. *Graduated with Excellent (A) grade in the project.*

CERTIFICATIONS

Backend Development Training (Python & Django) [Oct 2022]

Django Greeny – E-commerce Website

- Built RESTful APIs for products, orders, and authentication using Django REST Framework.
- Implemented JWT authentication, Redis caching, and background tasks with Celery.
- Deployed using Docker.
- **Tech:** Python, Django, PostgreSQL, DRF, Redis, Celery, Docker

GitHub: <https://github.com/Kamal7El-Sayed/Django-Greeny-Ecommerce-Website>

Task Manager System (Django)

- Developed a task management web application with full CRUD operations (create, update, delete tasks).
- Implemented user authentication and authorization with secure access per user.
- Designed RESTful APIs using Django REST Framework for task operations.
- Integrated PostgreSQL database and Django ORM for efficient data handling.
- Focused on clean code, reusable components, and scalable backend structure.
- **Tech:** Python, Django, Django REST Framework, PostgreSQL, HTML, CSS, JavaScript.

GitHub: <https://github.com/Kamal7El-Sayed/django-todo>

Djblog

- A blogging platform with user authentication, CRUD operations for posts, and admin management.
- **Stack:** Python, CSS, HTML, JavaScript.

GitHub: <https://github.com/Kamal7El-Sayed/djblog>

Courses Website

- An online course management system for user authentication, enrollment, and content management.
- Includes responsive UI and admin panel for managing courses.
- **Stack:** Python, HTML, CSS.

GitHub: <https://github.com/Kamal7El-Sayed/courses-website->

Python Bank System

- A banking application for managing accounts, deposits, withdrawals, and balance tracking.
- Integrated MySQL database for secure transaction handling and account history.
- **Stack:** Python, MySQL.
